

Same question for all teams:

Present your project in 2 minutes taking into account the 4 criteria on the board.

Respected the time
limit.

Presented according to
the 4 criteria.

Same question for all teams:

Does the project reduce waste or encourage recycling?

Respected the time limit?

Does the project significantly decrease the amount of waste produced or does it only make a minor impact?

Does the project introduce new methods or techniques for recycling materials, or improve upon existing ones?

Same question for all teams:

Does the project involve any negative impact on natural habitats or biodiversity?

Respected the time limit?

Has a thorough assessment been conducted to identify any potential negative impacts on natural habitats or biodiversity?

If potential negative impacts have been identified, does the project propose effective strategies to mitigate or offset them?

**What materials are used
in the project ?**

Respected the time limit?

Does the project utilize recycled, renewable, or locally sourced materials? Are these materials safe and non-pollutant?

**Does the project
promote energy
efficiency?**

Respected the time limit?

Does the project incorporate methods or designs to reduce energy consumption? Is there a potential for the project to run on renewable energy sources?

**How does the project
impact the local
community?**

Respected the time limit?

Does the project have a positive influence on the local community, such as creating jobs, improving infrastructure, or enhancing the local environment?

Is the project user-friendly?

Respected the time limit?

Is the project easy to use and understand for all ages and abilities? Does the project design take into account the comfort and convenience of the user?

**Can the project be
maintained easily?**

Respected the time limit?

Does the project require
complex or costly maintenance?
Is it easy to repair or replace
parts if needed?

**How does the project
contribute to a
healthier environment?**

Respected the time limit?

Does the project reduce
pollution or harmful emissions?
Does it contribute to cleaner air,
water, or soil in its surrounding
environment?
